

ARTIST STATEMENT

A lot of people dream in black and white. Well, personally I don't. My dreams are bright, fuzzy, and obviously in COLOR!

This body of work has been inspired by my dreams - the way I see the world when I'm deep deep asleep; really saturated and bright colors, a little blurry or maybe too sharp, in isolated settings with a touch of Fashion and Style, or uninhabited urban landscapes in a post-apocalyptic era waiting for somebody to walk by .

Most of this work was shot with a high resolution DSLR. Some works were shot with a 35mm camera and medium format, printed large scale to communicate its intensity and dimensions. I guess my dreams couldn't wait any longer to wake up and see the world! Enjoy.

Gaspar Marquez
